

New Organization — Admin Setup & Readiness Checklist

Everything a newly created college, university, coaching institute or school needs configured before its Admin can run the full workflow — create, schedule, conduct, grade and publish an exam — without a missing setting quietly breaking a step.

PREPARED FOR

ExamVault Admin, new tenant

SCOPE

16 configuration surfaces

WORKFLOW COVERED

Org creation → Published result

STATUS KEY

Required · Recommended · Optional · Platform-managed

01 · THE PIPELINE

The ten-step path from a blank tenant to a published result

Every configuration item below exists to keep one or more of these steps from stalling. The stepper is the map; the dossier after it is the detail.

1

Create Organization

Super Admin sets Name, Org Type & Subscription Plan

2

Admin Setup

Forced first password change activates the tenant

3

Add Users / Students

Single add or bulk CSV import

4

Configure Academic Data

Program/Department/Semester branding

5

Create Exam

Needs Passing Marks; can't publish with 0 questions

6

Schedule Exam

Assign to students, set the window

7

Conduct Exam

Security & Proctoring settings apply automatically

8

Generate Results

Pass/Fail from Passing Marks; grade from fixed bands

9

Generate Reports / PDFs

Uses Branding & Result Field settings

10

Publish Results

Gated by Result Publishing Mode (default: Manual)

Sixteen configuration surfaces, field by field

Grouped the way an Admin actually encounters them. Each entry names where it lives, what breaks without it, and whether ExamVault blocks you, warns you, or just quietly falls back to a default.

Identity & Branding

What the organization is, and what its documents look like.

Organization Profile & Basic Information

RECOMMENDED SILENT FALLBACK

WHERE IT'S CONFIGURED
Settings → Organization Settings → General

DEFAULT VALUE
Institution Name & Organization Code are set once by Super Admin at creation and locked; every other field (short name, website, contact, registration/tax no., time zone) starts blank

WHAT DEPENDS ON IT
PDF report letterhead (name, address, contact line), portal display name

IF LEFT UNCONFIGURED
Generated PDFs simply omit the blank contact/address line — nothing errors, the letterhead just looks sparse

Organization Type

RECOMMENDED SILENT FALLBACK

WHERE IT'S CONFIGURED
Set by Super Admin at organization creation; shown read-only under General ("contact Super Admin to change")

DEFAULT VALUE
Unset → falls back to a generic, safe default field & report catalog

WHAT DEPENDS ON IT
Which academic/student/result fields and which report types (Certificate, Detailed Exam Report, ...) are treated as relevant to this institution

IF LEFT UNCONFIGURED
Admin still gets a full working field/report set — just not tailored (e.g. a coaching institute sees university-shaped labels)

Branding & Logo

OPTIONAL SILENT FALLBACK

WHERE IT'S CONFIGURED
Organization Settings → General (Logo & Visual Identity, Branding Colors, Authorized Signatory)

DEFAULT VALUE
No logo/favicon/signature; brand colors default to ExamVault's own palette

WHAT DEPENDS ON IT
PDF report header/footer and the in-app report preview. Does *not* reach Certificates — those are always ExamVault-branded, see below

IF LEFT UNCONFIGURED
PDFs fall back to an auto-generated initials badge in place of a logo, and the signatory line prints blank

Academic & Results

How students are classified, how exams are scored, and what appears on the paperwork.

Academic Configuration (Program / Department / Semester / Division)

OPTIONALSILENT FALLBACK

WHERE IT'S CONFIGURED	WHAT DEPENDS ON IT
Organization Settings → Academic Configuration (type-specific fields, managed Program/Department/Semester/Division lists, Result Fields checklist)	Program/Department/Semester/Division columns on Create/Edit User and on the Student Reports export; which result fields print on generated reports
DEFAULT VALUE	IF LEFT UNCONFIGURED
Empty; an unset Result Fields checklist is treated as “show everything” rather than hiding data	Student records show a blank cell for the missing field — never a fabricated value

Grading System & Passing Criteria

REQUIREDBLOCKS

WHERE IT'S CONFIGURED	WHAT DEPENDS ON IT
Tenant default: Settings → Exam Settings (Passing Score %). Actual value: Create Exam form, per exam	Pass/Fail on every result; certificate eligibility (fixed at 80%+ and passed, not configurable); letter grade A+/A/B/C/F (fixed thresholds, not configurable)
DEFAULT VALUE	IF LEFT UNCONFIGURED
Tenant default 40%, pre-filled on Create Exam	Create Exam cannot be submitted without a Passing Marks value — the form and the server both reject it

Result & PDF Configuration

OPTIONALSILENT FALLBACK

WHERE IT'S CONFIGURED	WHAT DEPENDS ON IT
Organization Settings → Reports & Documents (QR verification, contact details, page numbers, brand colors in header, watermark)	Cosmetic layout of every generated Student Result / Exam Result / Detailed Exam Report PDF
DEFAULT VALUE	IF LEFT UNCONFIGURED
QR code, contact details and page numbers ON; watermark OFF	Reports generate fine with ExamVault's stock layout defaults

Certificate Configuration

PLATFORM-MANAGED

SILENT FALLBACK

WHERE IT'S CONFIGURED

No settings screen exists — there is nothing to configure.

DEFAULT VALUE

Always ExamVault-branded (not the tenant's own logo); fixed 80%-and-passed eligibility threshold

WHAT DEPENDS ON IT

Whether a given Exam Type awards certificates at all, and whether this Organization Type's report catalog includes "Certificate"

IF LEFT UNCONFIGURED

N/A — a student either qualifies by score, or does not; nothing an Admin sets up changes this

Exam Defaults & Preferences

RECOMMENDED

SILENT FALLBACK

WHERE IT'S CONFIGURED

Settings → Exam Settings (Duration, Passing Score, Max Attempts, Negative Marking, Auto Submit)

DEFAULT VALUE

60 min · 40% · 3 attempts · negative marking on (-0.25) · auto-submit on — auto-seeded the moment the tenant exists

WHAT DEPENDS ON IT

Pre-filled values on Create Exam, and the attempt/markings/auto-submit rules copied onto every new exam

IF LEFT UNCONFIGURED

Nothing to fix — sensible defaults are already active before the Admin opens this screen

People & Operations

Who can do what, who is actually in the system, and what protects an exam in progress.

User Roles & Permissions

OPTIONAL

SILENT FALLBACK

WHERE IT'S CONFIGURED

Users → Roles & Permissions (Instructor and Student rows are editable; Admin/Super Admin are not shown here)

DEFAULT VALUE

A sensible per-role permission set is seeded automatically, mirrored server-side

WHAT DEPENDS ON IT

Which sidebar actions an Instructor or Student can reach; a subset of permissions are genuinely server-enforced, the rest remain informational until their backend policy ships

IF LEFT UNCONFIGURED

Default permissions apply with no action needed — only touch this to restrict or expand a role

Student / Instructor Setup

REQUIRED

BLOCKS

WHERE IT'S CONFIGURED

Users → Add User (one at a time) or Import Users (bulk CSV)

DEFAULT VALUE

A brand-new organization starts with zero students and zero instructors

WHAT DEPENDS ON IT

Literally everything past this point — assigning exams, taking exams, and every result/report has to have real people to act on

IF LEFT UNCONFIGURED

The pipeline has nobody to schedule, examine or grade — it cannot proceed past “Create Exam”

Notification & Email Configuration

PLATFORM-MANAGED

SILENT FALLBACK

WHERE IT'S CONFIGURED

Reminder windows: Settings (tenant-wide). Channel per notification type: each user's own preferences, not an org setting. Delivery itself: a platform-level integration (see Required Integrations)

DEFAULT VALUE

24h & 1h reminder windows both on; in-app & email both on per user by default

WHAT DEPENDS ON IT

Exam reminder pings and result/notification delivery

IF LEFT UNCONFIGURED

Reminders keep firing on sensible defaults — there is no per-org email setup screen to leave incomplete

Exam Security Settings

OPTIONAL

SILENT FALLBACK

WHERE IT'S CONFIGURED

Settings → Security Settings (Fullscreen Enforcement, Tab Switching Detection, Copy/Paste Restriction, Right-Click Restriction, Session Timeout)

DEFAULT VALUE

Every protection ON, 30-minute session timeout

WHAT DEPENDS ON IT

Which anti-cheat checks run during any proctored exam — shares one backend table with Proctoring Settings below

IF LEFT UNCONFIGURED

Protections are already active before the Admin ever opens this screen

Proctoring Settings (if applicable)

OPTIONAL

SILENT FALLBACK

WHERE IT'S CONFIGURED

Settings → Proctoring Settings (master switch, Face Detection, Multiple Person Detection, Screen Monitoring, Multiple Monitor Detection)

DEFAULT VALUE

Every detector ON

WHAT DEPENDS ON IT

Only activates on an exam *assignment* that itself has “Enable Proctoring” checked — this screen is a ceiling, not a trigger

IF LEFT UNCONFIGURED

Detectors stay available; the per-assignment checkbox still gates whether any exam actually uses them

Platform & Growth

Ceilings and wiring that sit above any single Admin — mostly Super Admin or infrastructure territory.

Subscription Plan & Usage Limits

PLATFORM-MANAGED BLOCKS

WHERE IT'S CONFIGURED

Assigned by Super Admin at organization creation (Plans → Assign Plan) — not editable from the Admin console

DEFAULT VALUE

“Full Access” plan (effectively unlimited) unless Super Admin assigns otherwise

WHAT DEPENDS ON IT

Hard ceiling on Admins, Instructors, Students and Exams this organization can create

IF LEFT UNCONFIGURED

N/A — a plan is always attached. Once a real ceiling *is* reached, creating another user or exam is flatly refused, not just warned about

Organization-specific Report Settings

OPTIONAL SILENT FALLBACK

WHERE IT'S CONFIGURED

Derived entirely from Organization Type (above) — there is no separate report settings screen

DEFAULT VALUE

Unset Organization Type → a generic, safe report catalog

WHAT DEPENDS ON IT

Which report types (Certificate, Detailed Exam Report, ...) are offered at all for this institution

IF LEFT UNCONFIGURED

The report picker just uses the generic set — nothing is hidden that shouldn't be

Required Integrations

PLATFORM-MANAGED SILENT FALLBACK

WHERE IT'S CONFIGURED

A single workflow-automation webhook, configured once at deployment — outside any Admin or Super Admin screen

DEFAULT VALUE

N/A — either wired up by whoever hosts ExamVault, or not

WHAT DEPENDS ON IT

Every outbound email (reminders, notifications, password reset) and AI-assisted question generation

IF LEFT UNCONFIGURED

Email sends fail silently and are only visible in the delivery log — the in-app notification itself is unaffected; AI question generation returns an error instead of questions

Final Admin readiness checklist

One line per pipeline step. Check them off as you go — your progress is saved in this browser, so you can leave and come back mid-setup.

 0 / 10 complete

☐ **01 Organization created**

Name, Org Type and Subscription Plan confirmed with Super Admin.

☐ **02 Admin logged in & password changed**

This is what actually activates the tenant.

☐ **03 Branding & profile filled in**

Logo, colors, signatory, contact & address — optional, but every skipped field is a blank line on real PDFs.

☐ **04 Academic data configured**

Program/Department/Semester/Division lists and Result Fields, if this institution type uses them.

☐ **05 Exam Settings reviewed**

Default duration, passing score, attempts and negative marking match this institution's policy.

☐ **06 Security & Proctoring reviewed**

Confirm the anti-cheat defaults, or adjust the session timeout.

☐ **07 Students & Instructors added**

At least one of each, via Add User or bulk import.

☐ **08 Roles & Permissions reviewed**

Only needed if the default Instructor/Student permission set isn't right for this org.

☐ **09 First exam created, scheduled & conducted**

Confirms Passing Marks, question bank and assignment all actually work together.

☐ **10 Results generated, reported & published**

The full pipeline, end to end, on real data.
